

Transforming the Academic Operating Model

BACKGROUND

Anubavam's Higher Education AI Solutions modernize the full academic operating model across the student lifecycle, unifying admissions, academics, services, and alumni through AI-powered workflows and analytics.

CHALLENGE

- Disconnected systems for admissions, academics, finance, and student support
- Manual processes that slow teams and frustrate students
- Limited visibility into retention, risk, performance, and institutional effectiveness

Without a unified intelligence layer, leaders cannot make data-driven decisions or deliver the student experience modern learners expect.

SOLUTION

Our AI suite transforms academic and operational processes across the institution.

Solution Landscape:

- AI-Enhanced Admissions and Enrollment
- Student Success and Retention Intelligence
- Academic Planning and Workload Optimization
- AI-Powered Service Desk and Knowledge Portals
- Data Hub and Institutional Analytics for leadership

Key Capabilities:

- **AI chatbots** for student queries and 24/7 self-service
- **Early-warning** models to identify at-risk students and cohorts
- **Intelligent routing and workflow automation** for student services
- **Data fabric connecting** SIS, LMS, finance, HR, and CRM
- **Pre-built dashboards** for retention, accreditation, and institutional performance

RESULTS

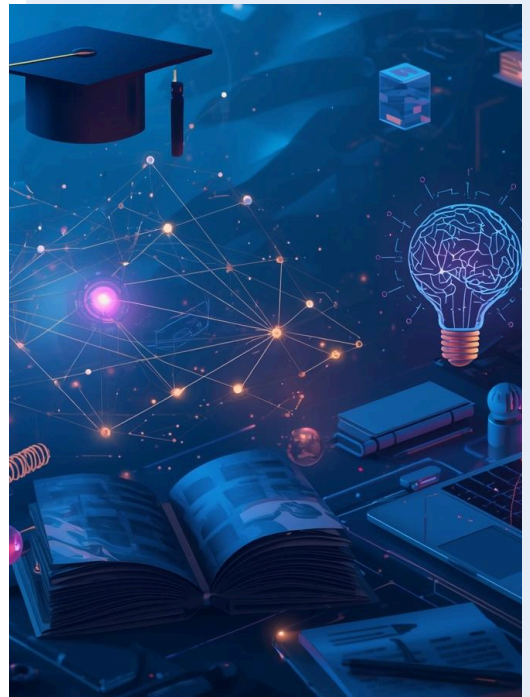

Institutions achieve:

- Faster response times and significantly improved student experience
- Higher retention, persistence, and completion rates
- Reduced staff workload on repetitive, routine tasks
- Stronger evidence and reporting for accreditation and audits

Deployment Options:

- End-to-end transformation programs
- Module-wise rollouts aligned to institutional priorities
- Integration with existing SIS, LMS, and campus systems

WHY ANUBAVAM

- Two decades of expertise in higher education technology and transformation
- Proven frameworks for academic models, data strategy, and AI adoption
- Global experience across universities, colleges, and online programs
